

How to Access Lab Environment

Overview

Before starting the F5 Distributed Cloud DNS labs, you need to access the lab environment through **F5 UDF (Unified Demo Framework)** and **Kasm Workspaces**. This guide will walk you through the steps to access and set up your lab environment.

Prerequisites

Item	Details
UDF Account	F5 UDF account with access to the DNS lab course
Web Browser	Modern browser (Chrome recommended)
Course Name	dns-xc-lab-jun-2026

Access Instructions

Step 1: Access UDF Course

1. Log in to **F5 UDF** (Unified Demo Framework) at <https://udf.f5.com>
2. Navigate to your enrolled course: **dns-xc-lab-jun-2026**
3. You will see the course overview page showing:
 - **Course Title:** dns-xc-lab-jun-2026
 - **Status:** Running (with time remaining)
 - **Options:** End in 4 days, Snooze, Autogrow, Restrict Egress
 - **Join** button (highlighted in the red box)
4. Click the **"Join"** button to access the lab deployment.

Deployment Tags

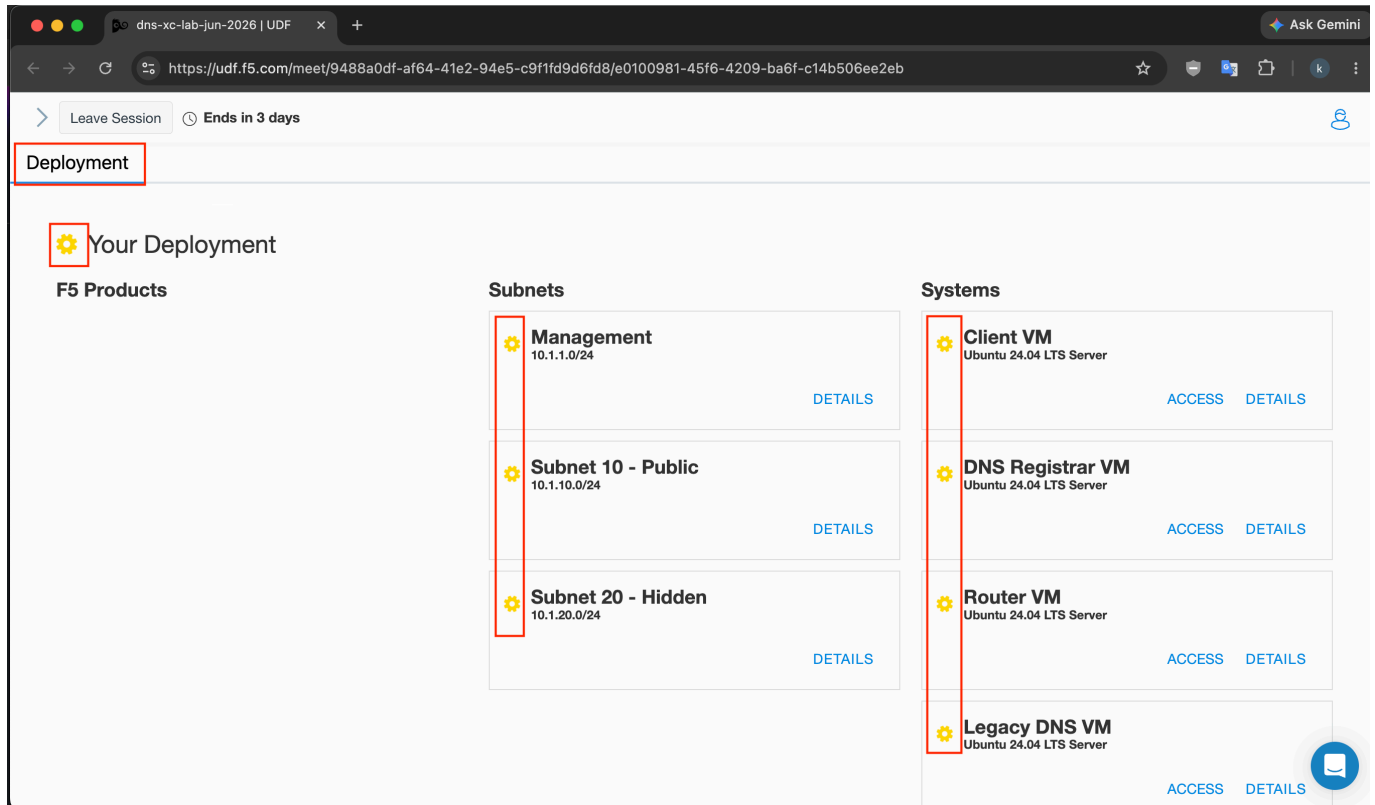

Name	Value	
Enter new tag name	Enter new tag value	🗑

Step 2: View Your Deployment

After joining the course, you will see the **Deployment** page showing your lab environment:

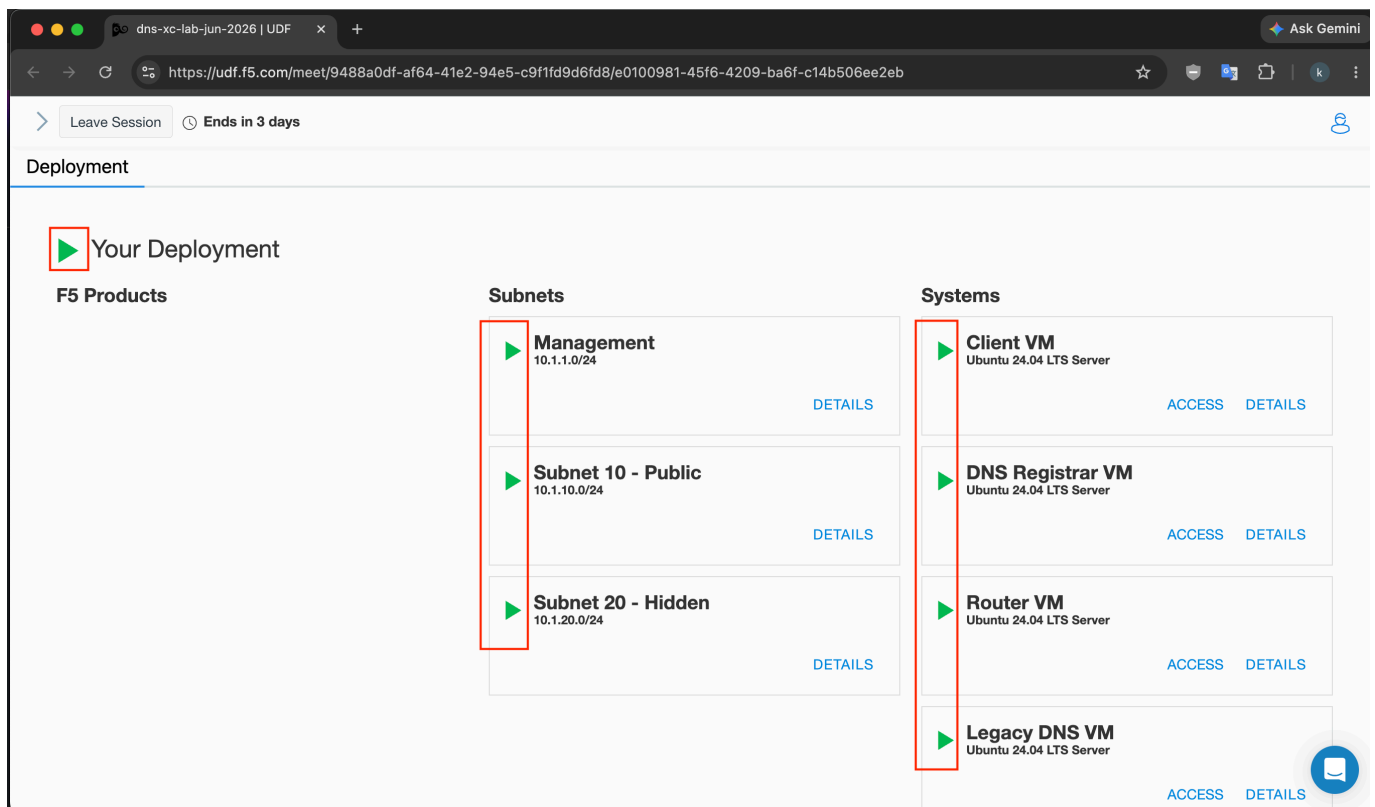

1. Click on the **"Deployment"** tab (highlighted in the red box) to view your deployment.
2. You will see **Your Deployment** section with:
 - **F5 Products** - Available F5 products
 - **Subnets:**
 - Subnet 10 - Public
 - Subnet 20 - Hidden
 - **Systems:**
 - Client VM
 - DNS Registrar VM
 - Router VM
 - Legacy DNS VM
 - Legacy DNS VM 2

 **Important:** Wait for all virtual machines to start successfully. You will see a **yellow gear icon** while the VMs are starting. Wait until the icon changes to **green**  before proceeding to the next step.

Step 3: Deployment Full View

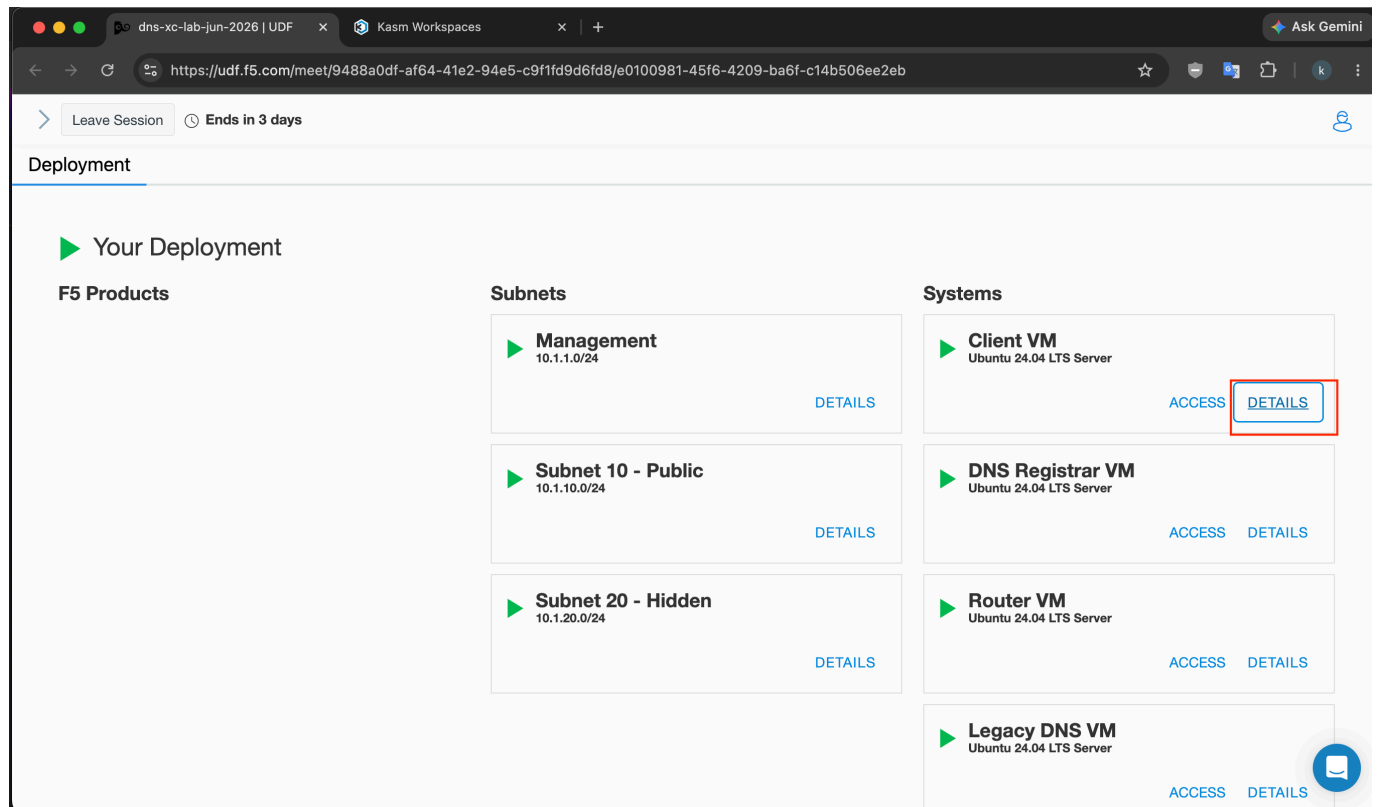

✅ **Ready to proceed:** When all virtual machines are ready, you will see a **green icon** next to each system. This indicates that all VMs have started successfully and are ready for use.

Step 4: Select Client VM

To access the lab environment, you need to connect to the **Client VM**:

1. In the **Systems** section, locate **Client VM** (highlighted in the red box).
2. Click on **Client VM** to select it.
3. Click the **"DETAILS"** button (highlighted in the red box) to view the access options for the Client VM.

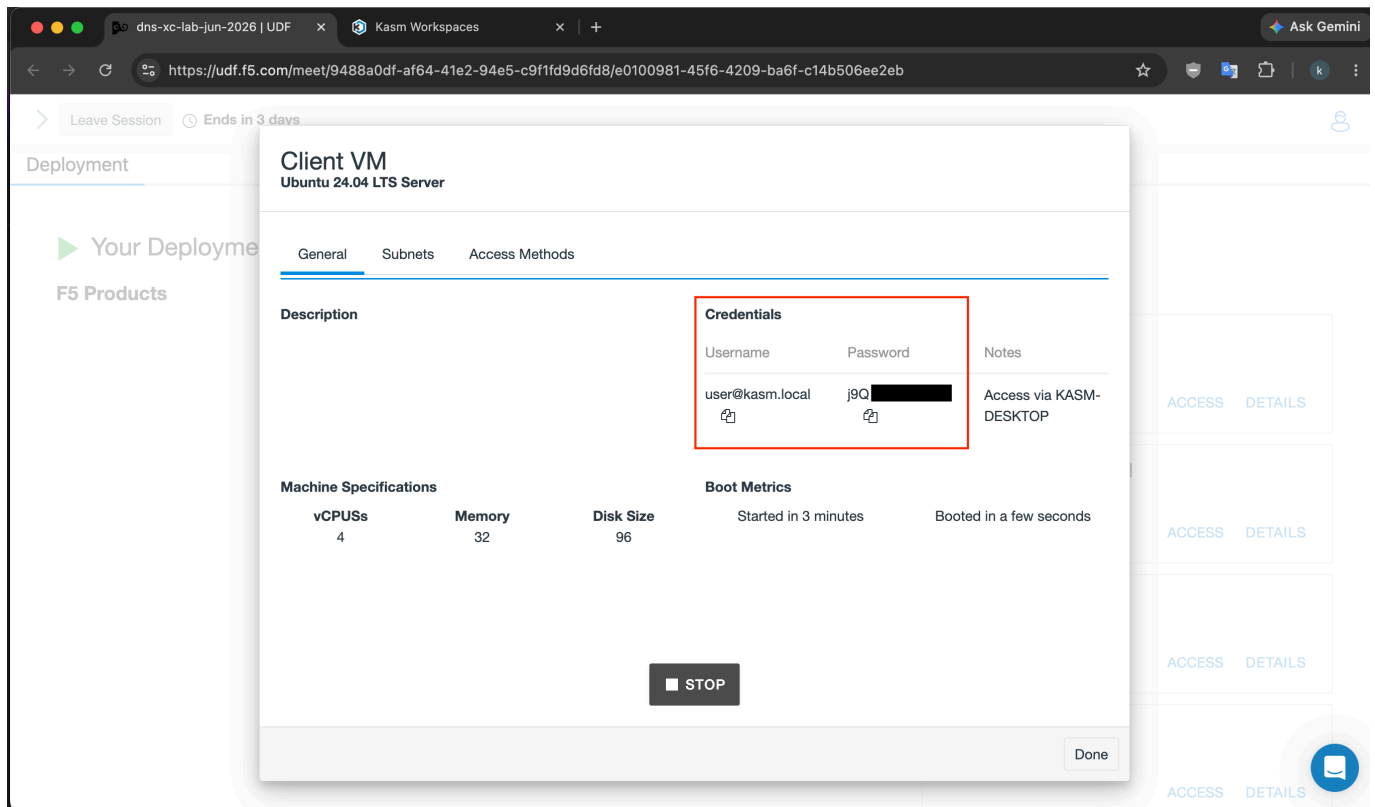

Step 5: Copy Credentials

After clicking the DETAILS button, you will see the Client VM details:

1. The **Client VM** is now selected
2. You will see the **Credentials** section showing:
 - **Username:** (e.g., `user@kasm.local`)
 - **Password:** (auto-generated password)
3. **Copy the credentials** (highlighted in the red box) — you will need these to log in to Kasm Workspaces in the next steps.

 **Tip:** Click the copy icon next to the credentials to copy them to your clipboard. Keep these handy for the Kasm login step.

Step 6: Choose Access Method

You will see the **Access Methods** dialog for the Client VM:

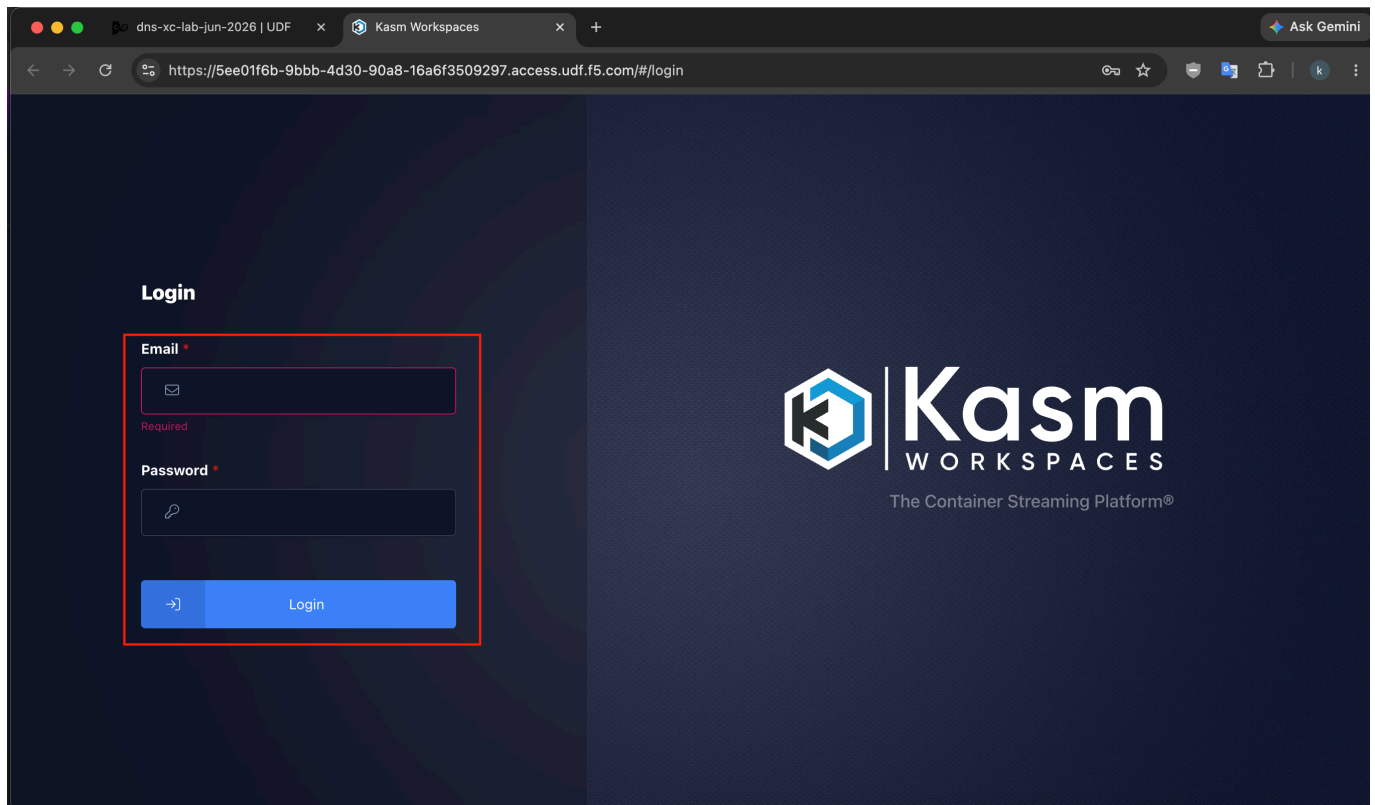

1. A dialog will appear showing available access methods for the Client VM.
2. You will see options including:
 - **Description** - VM details
 - **Documentation** - Related documentation
 - **Access Methods:**
 - SSH
 - RDP
 - **KASM** (recommended for this lab)
3. Click on "**KASM**" (highlighted in the red box) to launch the Kasm Workspaces environment.

Step 7: Kasm Workspaces Login

You will be redirected to the **Kasm Workspaces** login page:

1. You will see the **Kasm Workspaces** login page with the logo "The Container Streaming Platform®"
2. Enter your credentials in the **Login** form (highlighted in the red box):
 - **Email:** Your lab email (e.g., `user@kasm.local`)
 - **Password:** Password provided by your instructor
3. Click the **"Login"** button to access the Kasm desktop.

✓ What's Next?

After logging into Kasm Workspaces, you are ready to start the labs:

Lab	Topic	Description
Lab 1	DNS Availability	Eliminate single-provider DNS dependency
Lab 2	Attack Mitigation	XC DNS absorbs DDoS attacks in real-time
Lab 3	Hidden Primary	Hide BIND behind XC DNS for maximum protection

 **Tip:** Proceed to **Lab 1** to begin your F5 Distributed Cloud DNS training. The lab interface will guide you through each step.

Troubleshooting

Issue	Solution
Cannot access UDF	Verify your F5 UDF account credentials and course enrollment
Kasm login fails	Check with your instructor for correct credentials
Deployment not starting	Wait a few minutes and refresh the page
Client VM not responding	Try refreshing the browser or reconnecting

Support

If you encounter any issues accessing the lab environment, please contact your instructor or F5 support.
